

Introduction to Roping Basics

May 31st, 2015
10 to 4 pm

Have you secretly always wanted to rope but did not know where to start?

Are you a H.S. Rodeo /Little Britches competitor & would like to enhance your roping skills?

Are you a roper and not making all the catches you would like?

Clinic taught by Christy Bourbonnais with help from the ranch staff and guest speaker. Guest speaker is a H.S. & College State, Regional and National Champion; IFR Competitor, USTRC #5 header and heeler.

This is a comprehensive clinic mostly taught from the ground. Then we move on to following the roping dummy. We go over in detail the parts that you need to have in place in order to be a successful roper. An effective roper knows their rope, their swing, hand placement, loop sizing, delivery, catch, handling the slack, dally, arena difficulties, horse and cattle.

In this clinic we will start from the ground and work forward. Learn the parts of the loop, swing, delivery, slack management and dally. Be sure to get your swing down correctly and efficiently. We start teaching from the ground. You will get a chance to get started without having to manage the horse. This is a great beginner's clinic as well as for those who are newer to roping and not catching as many as you would like. This is a must clinic for new ropers – team, break away, or ranch roping. We will discuss the differences in ropes and what is needed for each event. Spread the word to your High School Rodeo or Little Britches participants!

Most often people think roping is easy until they get down and dirty into the roping scene and realize that there is more to it than meets the eye. Learn how to rope properly and from the start. This clinic is fun and educational for the serious roper! Not so serious? That's ok. You will find a wealth of information and a great learning environment at our facility. Were patient and kind when we instruct, but honest with our feedback. Were competitive people and are willing to help you become a better roper.

Come out and met new ropers and share the fun!
